

# Password Cheat Sheet

How long does it take for a hacker to “guess” my password?

Short and simple <b>321</b>	<b>&lt; 1 second</b>
Short and more complex <b>nG4</b>	<b>&lt; 1 second</b>
Long and simple <b>Passwort123</b>	<b>&lt; 1 second</b>
Long and complex <b>1Ahu8p0i4f</b>	<b>&lt; 1 year</b>
Long and complex with symbols <b>1Ahu&amp;p0:4f\$</b>	<b>~ 4 000 years</b>

But how can I remember strong passwords?

Choose a phrase <b>My red car has 4 brakes!</b>
Choose key letters from it <b>Mrcah4br!</b>
Swap some capitals and symbols <b>!mrCahFbr</b>
Add more symbols <b>!m3r0Cah@Fbr</b>

Or use a secure password manager.

How secure is this kind of password?

<b>!m3r0Cah@Fbr</b>	Required time for a hacker <b>&gt; 4 000 000 years</b>
---------------------	---

And please, even if you do have a red car, do not use exactly this password!
